

Capital Expenditure

Azilon Compliance Manager

Key Challenges

- Time Consuming Manual CER Process
- Complex Paper Management
- Effort Intensive & Costly Tracking Process
- Lack of financial reporting at various organization levels
- Ever changing Organization Structure
- Limit access of information to only key stakeholders

Managing budgets and capital expenditures is not a solitary activity. It is an ongoing activity and one of the highly collaborative tasks many business users participate within a health care organization. Major expenditures need to go through various levels of approvals in a multi-hospital system, before it can be approved based on the operational, financial and strategic objectives of the organization.

How CER Works

Azilon's CER product helps healthcare organizations manage the capital expenditure process, facilitating the process of approval and prioritization. It eliminates the constant headache of managing scores of paper requests, manual sending of reminders and inability to cope with the ever-changing forms and spreadsheets. Multiple users can access the product to evaluate the capital expenditure request, or to provide feedback. The product allows for the storage and archiving of all relevant documentation pertaining to the capital expenditure process for future access. The end goal is to responsibly manage the organization's assets.

Capital Expenditure Azilon Compliance Manager

Benefits

- Unified framework around the capital expenditure process
- Simple to Use - No infrastructure investment required
